

Microneedling is a two step process.

STEP 1 – In-Office Procedure

SkinPen delivers thousands of micro-injuries to initiate the body's wound healing process. The body begins to break down damaged tissue and produce healthy new cells. These cells repair and remodel the injured tissue, producing organized, healthy dermal tissue such as collagen and elastin.

STEP 2 – At-Home Topical Support

Optimal microneedling outcomes require proper cell nutrition during the 28 day remodeling process. The Skinfuse post-microneedling topical protocol delivers topical nutrients essential to the results, in a concise, easy-to-use daily regimen.

SKINFUSE® The Beautiful Advantage

Skinfuse increases the opportunity for dynamic results from the microneedling procedure by:

- Omitting common skincare ingredients known to increase the risk of inflammation or hinder the remodeling process.
- Delivering targeted skin nutrients to support skin remodeling

Skinfuse key ingredients include:

Vitamin C	Magnesium
Vitamin A	Zinc
Copper Peptides	Ginger Extract
Vitamin E	

Reverse the signs of aging • Revive skin health • Reveal beautiful skin
